UltraSpeed

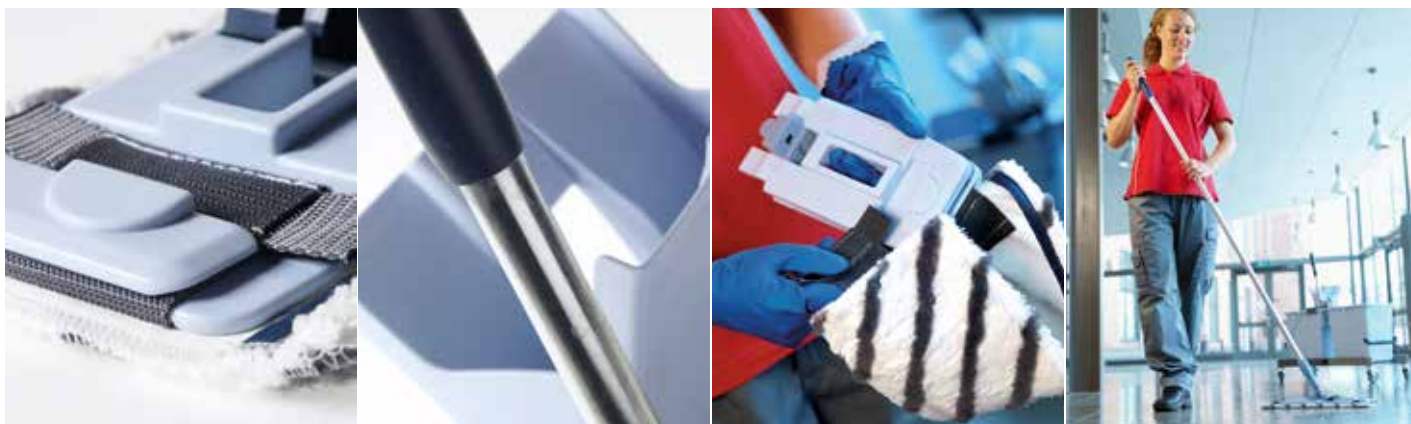

Performance Made Easy

Proudly North American.

Fill your bucket with new energy

The UltraSpeed System was developed to be simple to use, easy to clean difficult areas, offer maximum cleaning performance while significantly reducing mopping times. And all this at an affordable price. The result is a comprehensive floor cleaning system that sets new standards in usability, versatility, efficiency and ergonomics.

The benefits can be summarized in a single sentence: Performance made easy.

Are you having problems with traditional mopping? UltraSpeed is the answer!

UltraSpeed is based around an innovative wringer that simplifies the wringing of flat mops and is available in your choice of systems from a 12 qt. kit for small areas through the Origo trolley system for large premises.

Traditional Mopping

Poor Hygiene:

- Cotton mop heads suffer from poor appearance after several uses and can smell.

Low Performance:

- Mop heads are hard to control making it easy to accidentally splash water on furniture and skirtings.
- Cotton stores high levels of water in the mop head after wringing causing the mop head to aqua plane on the floor rather than clean it. The result is dirt being moved around the floor rather than removed from it.

Difficult to Use:

- Difficult to insert mop head into the bucket and press.
- Cannot be used to clean walls, skirtings and staircases
- Heavy
- The machinery often involves complicated press mechanisms that can break and be strenuous.
- Dust mopping is necessary before wet mopping

UltraSpeed

Hygienic:

- Microfiber cleaning performance
- Microfiber mop pads machine washable up to 500 times

High Performance:

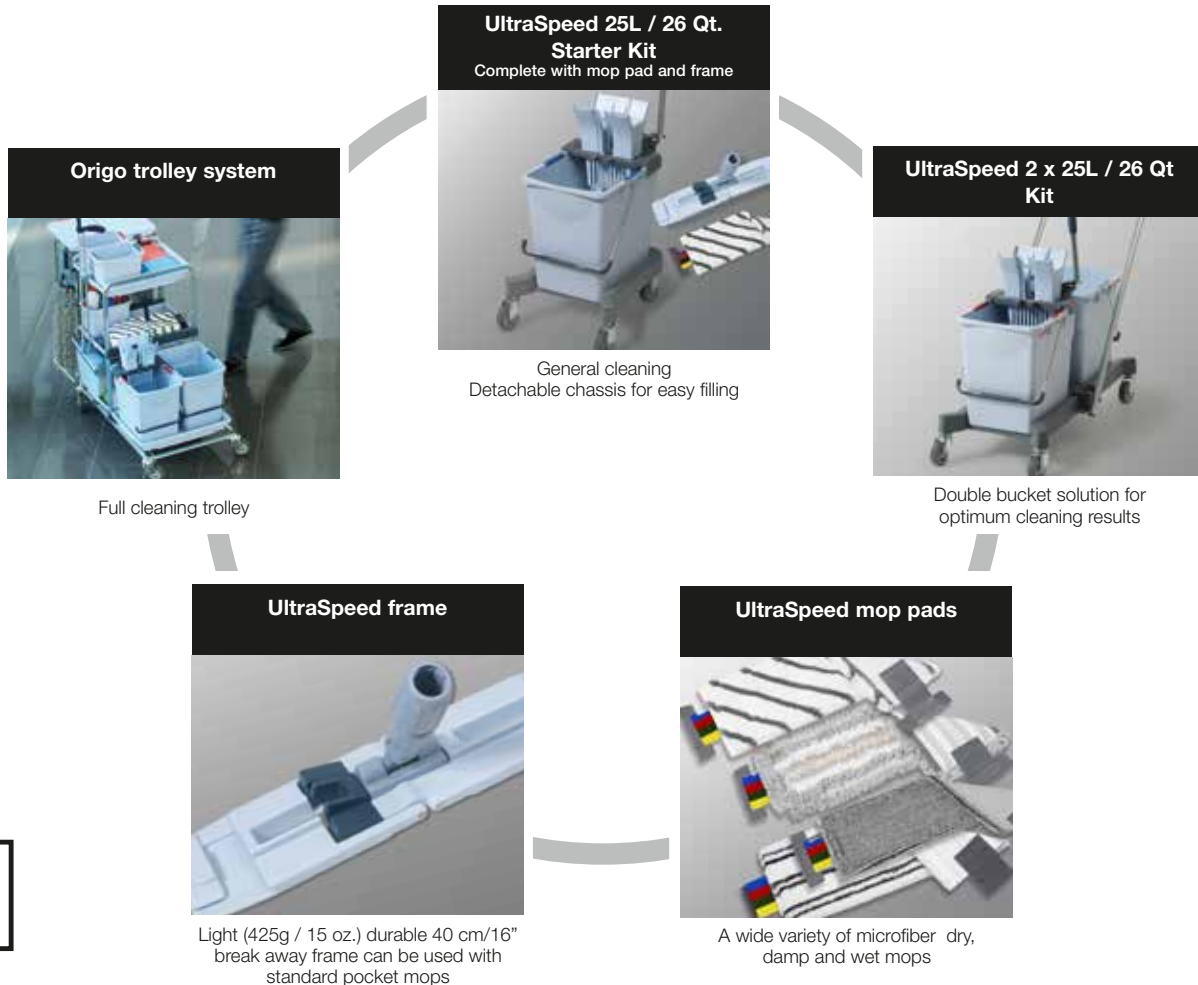

- 50% faster than conventional wet mopping over 50m² / 500 sq. ft.
- 35% faster drying, floors back in use twice as fast.
- 35% faster removal of stubborn dirt and stains.
- Unique, changeable colour coding system
- Special mop pad for use on safety floors
- A variety of mops for different application areas

Easy to Use:

- Easy to control. Flat mopping removes the chances of splashing other surfaces while cleaning.
- Effectively cleans skirting boards, walls and staircases.
- 50% lighter than conventional systems - ergonomic benefit
- Chassis system allows buckets to be detached, reducing the weight when emptying and filling.
- Eliminates the need for dust mopping.

One frame, all solutions

UltraSpeed allows you to use the same break frame and mop pad in all areas of your site through a range of buckets and trolley systems that all utilize the unique colour coding system. This comprehensive range coupled with the versatility to clean awkward areas like walls, staircases and safety flooring reduces the costs and complexity of your cleaning operation. For more information and to see a video of how UltraSpeed works log onto www.marinomop.com

Micro Plus mop - Universal (most versatile)

- Microfiber moppad for sealed and structured floors
- Power zone strips allow for scrubbing stubborn dirt
- For wet and moist mopping
- Washable up to 60° C/ 140° F

Trio Mop - Excellent water absorption

- Different fiber zones for absorbency and durability
- **White zone:** Microfiber for high mechanical cleaning action with minimal chemical use
- **Grey zone:** First quality polyester provides low friction and high durability
- **Beige zone:** Blended polyester and viscose to provide absorbency
- Maximum temperature 95° C/ 203° F

Micro Lite - Economical

- All purpose microfiber moppad for intensive cleaning
- Polyimide stripes to clean stubborn dirt very easily
- For wet and moist mopping and can be used for waxing
- All mops are washable up to 60°C/ 140° F

Micro Safe Mop - Rough Surfaces

- Special mop for textured surfaces
- For wet scrubbing excellent in loosening stubborn dirt
- Washable up to 60° C/ 140° F
